

ACCESS CONTROL BOXX

Monthly Parker Card Access Only Lanes

RFID Parking Entrance & Exit

- Controlled by CloudEASE, the Parking Management Software.
- Quickly & easily add new card types, cards and card holders.
- Configure complex access rules based on access level, card type, pathway, date & time and pass back (timed, strict or soft).
- Custom branding: corporate colors, logo and customized text.
- 5" Color LCD offers easy navigation with programmable story boards plus customizable/advertising images and multiple languages.
- Offline mode saves transactions for syncing upon reconnect.
- Internally-mounted illuminated keypad to log in and change settings. Not recommend for end-user key code access.
- UPS backup power protects electronics with surge suppression and offers automatic voltage regulation.
- Thermostatically-controlled heater.
- Powder coated, stainless steel kiosk with locks.
- Slim profile fits on narrow islands: 15" x 11" footprint.

OPTIONS

- Call for Assistance: VoIP or Analog intercom. (shown)
- Add a 2D barcode scanner. (shown)
- Upgrade from standard RFID to HID card access readers (proximity or long range) with CloudEASE.
- Alternatively, mount your existing building access system card readers to be controlled by that access system.
- Card Return slot for hotel guest key cards.
- Add security cameras.
- Add lot open/full, spaces available and other signage.
