

CASHIER BOXX

Ticket Rating & Payment

Payment by Credit Card (EMV) or Cash

- Controlled by CloudEASE, the Parking Management Software that manages multiple rate structures, discounts, coupons, passes and more!
- Scanner reads 1D & 2D/QR barcodes on paper or phone, including tickets, coupons, applies discounts and validations.
- Processes real-time payments via PCI-compliant EMV encrypted credit card reader. Magnetic stripe, chip, or tap.
- Validation discounts automatically applied upon scan.
- Successful payment creates paid ticket to take to Exit or if in Exit lane, then opens barrier gate arm & closes ticket. Receipt printing is automatic or optional.
- Operates off-line in the event of network or Internet loss.
- UPS backup power protects electronics with surge suppression and offers automatic voltage regulation.

OPTIONS

- Customer-facing 2nd Display shows amount due, change due.
- Call for Assistance: VoIP or Analog intercom.
- Utilize RFID card access readers (proximity or long range) with CloudEASE or your existing building access system.
- Add security cameras or LPR.
